[Project Name]

[One-sentence description of what the project does and who it is for.]

[Badges: build status · version · license]

Features

- [Key feature]
- [Key feature]
- [Key feature]

Getting started

Prerequisites

- [Runtime and version, e.g. Node.js 22+]
- [Database or service, e.g. PostgreSQL 16]

Installation

```
git clone https://github.com/[user]/[repo].git
cd [repo]
[npm install]
```

Usage

[Show the most common way to use the project, with a short example.]

```
[npm run start]
```

Configuration

Variable	Description	Default
[API_KEY]	[What it is for]	[none]
[PORT]	[Port the server listens on]	[3000]

Running tests

```
[npm test]
```

Roadmap
